

At the Speed of NonStop

HP Education Services for HP NonStop Computing

HP Education Services is your solution for providing your technical teams with the knowledge, skills and confidence they need to get the most from your world-class NonStop system.

The HP NonStop system you purchased powers the most demanding business-critical applications in your IT datacenter. In addition to experience, knowledge and skills are key components for utilizing technology in a high-demand enterprise environment. With HP Education Services for HP NonStop computing, you can capitalize on a reputable method of training in order to gain the knowledge and skills you need to get the best performance and the most uptime from your world-class NonStop system.

By ensuring that your IT staff undergo Nonstop server training, your staff will also gain the confidence they

need to ensure that all systems and applications are developed and handled correctly and expertly. This is particularly important because NonStop servers require fewer people to operate and maintain than the average server, and so technical teams carry a large responsibility.

So take advantage of all the features available from these high-performance servers and software with training from HP. HP offers flexibility for business schedules as well as a range of cost-effective curricula. Consider the benefits of HPES, and realize the full potential of your NonStop systems.

Learning solutions for today with a focus on the future

HP NonStop computing has been providing the preeminent platform for 24 x 7 computing and delivering peak levels of availability, fail-safe data integrity, and linear scalability for ultimate business continuity. HP NonStop servers and software offer the highest level of service of any platform in their class.

HP Education Services' comprehensive portfolio of courses provides the learning solutions required for NonStop technical professionals to get the most from NonStop systems both today and into the future. HP NonStop courses cover open application development environments, Java-based tools, and support for just about any standard on the market. NonStop server courses also cover CORBA, Java, POSIX, Tuxedo, and Web services application program interfaces (APIs) that fully integrate with other servers running open standards.

HP Education Services' comprehensive portfolio of courses provides the learning solutions required for NonStop technical professionals to get the most from NonStop systems.

Each topic area below represents a curriculum path with multiple courses:

By job function:

These three curricula cover the technology and know-how needed to perform tasks under each job function area:

- Application development
- Server system support
- Server administration

By technology:

These five curricula cover the product information for each technology area:

- Open System Services (OSS)
- Java
- SQL/MX
- SQL/MP
- Transition to HP Integrity NonStop NS-series Systems

Capitalize on benefits with results

HP Education Services is the "support campus" for the IT community. HP developed NonStop, designs its functionality, and controls its evolution. As a result, you benefit from access to the best experts available who train thousands annually. Let HP be your source of training for new NonStop employees or NonStop veterans seeking knowledge around enhancements and new system features. Classes are available for all levels of professional skill sets, with curriculum paths that elevate your workforce to the next level. HP NonStop training is designed for system managers and designers as well as support personnel and developers.

HP NonStop training is education made easy. With a variety of training methods from which to choose, you and your staff can opt for traditional instructor-led courses at an HP education center or business location, or online, remotely-assisted training. Learning solutions tailored to your needs and delivered at a site of your choosing are also available. Ask your local Education Services representative for a consultation.

HP Certified Professionals

The HP Certified Professionals Program gives you an opportunity to validate the HP NonStop administration skills that you have learned in our courses and your time on the job.

The HP Certified Professional Program currently supports four NonStop credentials in five different levels of certification as follows:

- Accredited Integration Specialist (AIS) – HP NonStop Systems
- Accredited Systems Engineer (ASE) – HP NonStop Systems
- Master Accredited Systems Engineer (MASE) – HP NonStop Systems
- Certified Systems Engineer (CSE) – HP NonStop Kernel
- Certified Systems Developer (CSD) – HP NonStop Application Developer

For more information, visit www.hp.com/go/certification.

Training opportunities beyond NonStop

In addition, HP offers a variety of related training covering the following technologies:

- HP Software, including network, systems, storage, telecom, management, and more
- HP StorageWorks and storage area networks (SANs)
- HP Imaging and Printing
- IT Service Management based on the IT Infrastructure Library (ITIL)
- Project Management

For more information

Training has a huge impact on today's IT business environment and HP Education Services plays a significant role in helping your company build a wide range of enterprise server technical skills and a sound knowledge base in mission-critical computing.

Contact your local HP Education Services rep today, and we will help you plan a simple or comprehensive program of training that is flexible and adaptable to your specific needs. To find your local HP Education Services country contact, or to review schedules and register for a course online, go to www.hp.com/learn/nonstop and select your country from the drop down menu.

Also, ask about HP Education Care Pack Services, a flexible, economical and simple way to purchase HP NonStop Training.
