course description

## Implementing and Administering Security in a Microsoft Windows Server 2003 network

**u8842s**  
**MOC2823**  
**exam 70-299**

### course overview

This five-day instructor-led course addresses the MCSA and MCSE skills path for IT Pro security practitioners, specifically addressing the training needs of those preparing for the 70-299 certification exam.

The primary product focus is on Microsoft Windows Server 2003 based infrastructure solutions but will include some client focused content where appropriate. This learning product is to provide functional skills in planning and implementing infrastructure security.
