

Course overview

HP Software Building Identity Management Solutions with Select Access 6.0 (UC321S)

This course is designed to provide the skills and knowledge necessary to successfully configure and deploy HP Select Access Software. Through case scenarios that mimic real-life scenarios and extensive hands-on exercises, participants will learn to configure and manage Select Access.

Audience

This course is technology-focused and is intended for solution architects, deployment specialists, implementers, and administrators of HP Select Identity Software

Prerequisites

- Basic knowledge of networking and Windows systems administration
- (Desired) Basic knowledge of authentication, authorization, and identity management principles
- Information at the following web site is recommended preparatory reading:
<http://www.managementsoftware.hp.com/products/select/index.html>

Course Objective

After completing this course, the student will have the knowledge to:

- Design an access management system using HP Select Access Software.
- Deploy Select Access components.
- Define resources and the security policy that apply to them.
- Understand advanced integration issues, including product customization and integration.

This is primarily a technical training course focused on deployment and architecture of the product.

Benefits to You

HP Select Access Software is a high-performance access management solution that provides a uniquely intuitive user interface for administration.

This course is meant for solution architects, technical consultants and administrators.

Completing this course:

- Gives students the skills and knowledge they need to correctly and efficiently configure and deploy Select Access
- Allows students to use Select Access as a key part of an overall HP Software solution
- Provides a thorough understanding of Select Access' features and functions
