

HP Virtual Training Room LCMS Solution

HP Services

Fast, Simple, Affordable Learning Content Management

HP education services, in collaboration with TeraLearn, offers an affordable, SCORM compatible, comprehensive, high performance, easy to scale LCMS solution for delivering and managing e-Learning. Includes all HP Virtual Training Room Registration and Testing features including skills assessments, training plans, course completion tracking, and launching and tracking of web-based courses.

LCMS is designed to provide organizations with a fast, simple, and affordable technology to facilitate learning and manage content updates. Benefits include:

- Fast, secure, and easy to implement solution with no server support requirements
- Hosted solution. No software upgrade challenges. No plug-ins.
- Help reduce development and maintenance costs
- Readily available support
- Centralized 128-bit SSL security and password protection to help protect course content, user records and company intellectual property

Rapidly publish Web-Based Training

Take advantage of emerging e-Learning capabilities. Courses include default user controls such as:

- Jump to Main Menu
- Bookmark
- Notes
- Test
- Navigation Controls (Up, Down, Next)
- Progress Indicator
- Glossary

- Handbook/Resource Directory
- Show once

Full-Featured Learning Content Management System

Course Authoring Ease

The LCMS publishing system tools enable your training team to design, develop and deploy web-based training using Microsoft Word, PowerPoint and Excel.

Content Maintenance and Updating

Content management allows users, instructors, developers, managers and administrators to participate in product improvement by identifying, tracking, assigning and rating criticality of content. This helps reduce development and maintenance cost as you more easily keep your materials up to date.

Reusable Learning Object Support

Create, manage, and automatically update course objects. Create a new course by selecting objects from the course section library you have built.

SCORM 1.2 Compliant

The Sharable Content Object Reference Model (SCORM) specifications, built upon the work of the AICC, IMS, and IEEE, helps you build compatibility with other SCORM-based 3rd-party products as well as enables you to port your SCORM courses to other systems.

Performance Support

A comprehensive performance support system helps you incorporate help, documentation, jobs aids, glossary, reference, and URLs within course structure and externally to courses through hyperlinks. No programming is required.

HP Virtual Training Room Integration

Launch and manage the HP Virtual Training Room with integrated waitlist and reschedule features. Remote development is facilitated with live demonstrations and file sharing that allow project team members to share resources and desktop.

Web-External

Turn any web resource into a training resource. This enables your organization to integrate, launch, and manage external web resources including FTP sites, URLs, or PDF file as web-based training.

Collaboration

Threaded discussion helps facilitate sharing of best practices across your corporation. Threaded discussion can be associated with any learning product or as a stand-alone class.

Demographics Management

Demographics provide you with the ability to assign users to unique courses or curriculum based on user input. These features are built into initial enrollment, login and testing.

Testing Assessment

Test generation and reporting engine is fully integrated with the LCMS. Test item types include:

- Multiple Choice – Single and Multiple Response
- True and False

- Fill-in the Blank
- Drag and Drop

Surveys

- Implement customized end-of-course survey associated with HP Virtual Training Room and Web-Based Training products.
- Supports the design, distribution and deployment of research surveys including three question types; open ended, single choice and multiple selections.

Prerequisites/Training Plans

Use prerequisites to set a required learner path and training plan.

Reports

Print or download detailed user, product, instructor, management-rollup and demographic reports.

Messaging

- Automatic customizable messages based on user action (course signup, completion, cancellation, missed, rescheduled, waitlist)
- Group member messages
- Customized messages to users based on course progress/status
- Set automatic reminder message in Microsoft Outlook for upcoming virtual rooms or physical classroom events.

Customization

- Customize banners, color, most text screens and translate the user interface into other languages.
- Supports customized "learning portal" design to access to company web pages.

Certificate

Administrator or developer can deploy customizable certificate for learners upon completion of a course or curriculum.

Classroom Training Management

Administrator or developer can setup, enroll and send room booking notification or setup request for instructor led classroom training.
